Value Proposition Canvas

Match what your customer needs with what you offer. Fill in the customer side first, using real quotes and observations from your interviews.

1. Customer jobs

What functional job is your customer trying to get done?

What emotional job: how do they want to feel?

What social job: how do they want to be seen by others?

2. Pains

What makes the job hard, slow, expensive or risky today?

Which pain is the most intense? Include a quote as evidence.

What are they worried might go wrong?

3. Gains

What outcome would genuinely delight them?

What would make them switch from their current option?

How would they know it had worked?

4. Your offer

What products or services do you provide?

Which specific pains does your offer relieve?

Which specific gains does your offer create?

5. Value proposition drafts

Draft one: lead with the most intense pain.

Draft two: lead with the most wanted gain.

Draft three: lead with what makes you different from the current alternative.

Which draft resonated most in testing, and what words did people use in response?
